VACCINES, ANTIBIOTICS, AND INFECTIONS: GETTING YOUR QUESTIONS ANSWERED

Tuesday evenings, October 15 – November 19
7:00 to 8:45 p.m., Main Campus, 513 Parnassus Avenue

What's the truth about vaccines? Do I really need to worry about bird flu and swine flu? And what are the facts about Lyme disease? How are all these new viruses I see in the news discovered? How do I protect myself and my kids against bed bugs, lice, and Staph? Why won't my doctor give me antibiotics every time I have a cold? Come hear from UCSF and nationally renowned experts in infectious diseases, microbiology, public health, dermatology, and pharmacy. In this course we will discuss fascinating and thought-provoking topics in infectious diseases that are relevant to us as individuals, communities, and society.

COURSE CHAIR: Jennifer Babik, MD, PhD, Assistant Clinical Professor, Division of Infectious Diseases

MEDICAL DETECTIVES: INSIDE THE MIND OF GREAT PHYSICIANS

Wednesday evenings, October 16 – November 20
7:00 to 8:45 p.m., Main Campus, 513 Parnassus Avenue

Ever want to be a detective and solve mysteries, conundrums, and enigmas? This course will teach you how physicians at UCSF function as detectives, solving strange illnesses, rare diseases, new infections and unresolved poisonings using their knowledge, deductive reasoning, and data gathering. Come inside the mind of a medical detective and see how it works – how they obtain clues, synthesize data to formulate a hypothesis, and select and interpret their tests based on these hypotheses.

COURSE CHAIRS: Jeffrey A Tabas, MD, Professor of Emergency Medicine; Director of Outcomes and Innovations, Office of Continuing Medical Education
Malini K. Singh, MD, Assistant Professor of Emergency Medicine; Medical Director, San Francisco General Hospital Emergency
