

# UCSF Osher Center for Integrative Medicine presents Mini Medical School for the Public

## HIV: PAST, PRESENT, AND FUTURE

Tuesday evenings, February 19 - April 02  
7:00 to 8:45 p.m., Main Campus, 513 Parnassus Avenue

After bursting on the scene in the early 1980's in San Francisco, HIV/AIDS has played a major role in this city's history. From the first days of tragedy to the major forces of political activism, San Francisco has helped shape treatment and prevention efforts globally. This series, taught by national and international leaders in HIV research, will present the history of the disease, how it was discovered, as well as explore how the epidemic continues to evolve worldwide. We will review the basic science of HIV/AIDS, and its clinical, socioeconomic, gender-based, and political ramifications. Drs. Paul Volberding and Jay Levy, medical pioneers in this field, as well as Dr. Diane Havlir, Chief of the Division of HIV/AIDS at UCSF and co-chair of the 2012 International AIDS Conference, will be joined by other renowned UCSF faculty to provide students a comprehensive, up-to-the-moment understanding of this complex disease and give a glimpse of what the future holds for a potential cure.

**COURSE CHAIR:**  
Monica Gandhi, MD, MPH, Associate Professor of Medicine, Division of HIV/AIDS, UCSF School of Medicine

### February 19

#### The History of HIV and Current Epidemic

*Origin of HIV and its Entry into Human Populations*

Monica Gandhi, MD, MPH

*The History of HIV in San Francisco and Current Epidemiology*

Paul A. Volberding, MD

### February 26

#### HIV: A Primer

*The Discovery of HIV and its Basic Science*

Jay A. Levy, MD

*HIV and its Diseases: Case Presentations from the Clinic*

C. Bradley Hare, MD

### March 12

#### HIV, Prevention and Global Health

*HIV, Economics and Global Health*

Diane V. Havlir, MD

*"PrEP"ing for Success*

Oliver Bacon, MD, MPH

### March 19

#### HIV: Focus on Women and Children

*Women: We are Not Little Men*

Monica Gandhi, MD, MPH

*Conceiving (or Not) in the 21st Century*

Deborah Cohan, MD, MPH

*HIV and Children*

Theodore Ruel, MD

### March 26

#### HIV, Hepatitis C, and Treatment

*What Do HIV Medications Do?*

George Beatty, MD, MPH

*Faster, Better and Shorter: The Current Revolution in Hepatitis C Treatment*

Annie Luetkemeyer, MD

### April 2

#### HIV: Dare We Say Cure?

*The Immunology of HIV*

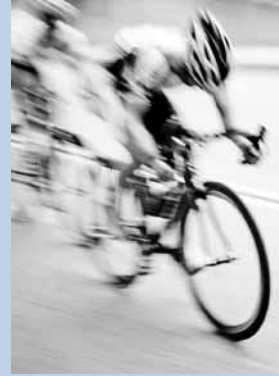

Peter Hunt, MD

*HIV and the Cure*

Steven G. Deeks, MD

## MEDICINE OF CYCLING 2013

NEW MISSION BAY LOCATION!

Thursday evenings, February 28 - April 4  
7:00 to 8:45 p.m., Mission Bay Campus, 600 16th Street

Cycling is a unique sport shared by kids and adults, used for recreation and transportation, and enjoyed by people of many fitness and ability levels. Kids, bike racers and commuters alike share the joy of adventure, speed, and accessibility the bike provides. All cyclists also share the pain of falling off the bike, overuse injuries, fear associated with injury, and other medical consequences that result from exposure to the elements.

This course, led by a multidisciplinary team of experts and cyclists in fields of neurology, psychology, urology, dermatology, nutrition, bike fit, and sports medicine, will cover a wide range of topics which affect every cyclist. Join us and the cycling community to discuss the ups and the downs of living and loving the bike.

**COURSE CHAIRS:**  
Anna Abramson, MD, Assistant Clinical Professor of Medicine; Co-Chair, Medicine of Cycling  
Kristin Wingfield, MD, CCFP, Diploma Sports Medicine (CASEM)

### February 28

#### BIKE FIT:

It's All About the Bike

Curtis Cramblett, PT

#### ACHES AND PAINS:

When is it Time to See the Doctor?

Kristin Wingfield, MD

### March 7

#### DERMATOLOGY:

Taking Your Skin on the Road

Timothy Berger, MD

#### TREATING THE PROS:

Stories from the Road

Prentice Steffan, MD

### March 14

#### PSYCHOLOGY:

It's All About the Mind

Jim Taylor, PhD

#### TRAINING:

Preparing to Race

Larry Nolan, USA Cycling Level 2 Coach

### March 21

#### NUTRITION:

What Fuels Your Human Powered Vehicle?

Heather Schwartz, RD

#### METRICS AND GADGETS:

How Do You Measure Up to the Pros?

Paul D. Abramson, MD

### March 28

#### WOMEN AND CYCLING:

Up Sides and Downsides of Title 9

Kristin Wingfield, MD

#### MEN IN CYCLING:

New York Times Warns Men about Long Bike Rides, Are They Right?

Peter Carroll, MD

### April 4

#### FINISH LINE:

Negotiating with your Brain

Eric Freitag, PsyD

## INSIDE UCSF MEDICAL SCHOOL: FOUNDATIONS FOR FUTURE HEALTH CARE PROVIDERS

Wednesday evenings, February 27 - April 3  
7:00 to 8:45 p.m., Main Campus, 513 Parnassus Avenue

Have you ever wondered what it would be like to be a first year medical student? Are you planning to pursue a career in healthcare but want to learn more first? Learn from the same faculty who teach the fundamental concepts of medicine to first-year medical students at UCSF. This course is an exciting and in-depth look at the core concepts of Immunology, Genetics, and Pharmacology. We have taken the essential concepts of these three important disciplines and condensed them into three, two-part classes suitable for students from any educational background. Prepare to challenge yourself as we explore the foundations of modern medical education.

This is the second of a special year long, three-part series. Certificates of participation will be provided for attendance.

\$30 Special Registration for Students with a Valid ID

**COURSE CHAIR:**  
Marieke Kruidering-Hall, PhD, Assistant Professor, Department of Cellular and Molecular Pharmacology; Co-Director, Postdoctoral Teaching Fellowship Program

### February 27

#### Immunology 101: The Basics and Introduction to our Patient

Katherine Gundling, MD

### March 6

#### Pharmacology: Bugs and Drugs, Part 1

Marieke Kruidering-Hall, PhD

### March 13

#### Pharmacology: Bugs and Drugs, Part 2

Marieke Kruidering-Hall, PhD

### March 20

#### Genes, Genomes and Human Disease, Part 1

Katherine Hyland, PhD

### March 27

#### Genes, Genomes and Human Disease, Part 2

Katherine Hyland, PhD

### April 3

#### Immunology 201: Application of the Basic Concepts to People

Katherine Gundling, MD
